Strategy

- The investment manager believes that we are currently in a period of extended correction caused by local panic, and that although we cannot specify the bottom, we are confident of a strong rally in the medium-term. The manager believes that Egypt's current high risk free rate is weighing on the markets valuation multiples, and that we need interest rates to start dropping in order to see a sustainable rally.
- As a result, the manager believes that we are not far away from the bottom if it has not been reached already, yet the market needs a catalyst to make a sustainable run. Therefore, the manager expects that we might move a bit of a sideways in the short term yet we think there is a strong rally from here over the medium term
