The bank's net income also grew by 29.2% to reach EGP3.56 billion. EFG-Hermes acquired 50% in Frontier Investment Management for total of USD21.5 million; this transaction will lead to an increase in EFG-Hermes total assets under management to reach USD4.5 billion. Juhayna released its 1H2017 results with 17.4% growth in operating revenues to reach EGP2.86 billion. However, the company's operating expenses also increased by 17.4% reaching EGP2.48 billion. On the other hand, net income dropped by 22.5% amounting to EGP85 million. This was due to a 56.4% increase in interest expense. El Sewedy Cables released its 1H2017 results reporting 95.7% increase in operating revenues to reach EGP20.66 billion. In addition, net income increased by 84.6% to reach EGP3.01 billion. Moreover, Egyptian International Pharmaceuticals (EPICO) announced its 1H2017 results showing an increase of 25.1% in operating revenues amounting to EGP1.20 billion. Egypt's GDP growth rate reached 4.1% and it is expected to increase in a range between 4.6% to 4.8% in FY17/18. The government is also expecting that tax revenue will increase to 17% of GDP up from its current level of 13%. According to the Central Bank of Egypt (CBE), net tourism surged from a deficit of USD324 million to a surplus of USD1.6 billion. The CBE also cleared all Egypt's backlog of foreign currency requests that have been pending since the currency flotation in November 2016. Egypt's inflation rate decreased from 33.0% in July to 31.9% in August 2017 while Net International Reserves increased from USD31.3 billion in June 2017 to USD36.1 billion in August 2017.

Investment Strategy

The fund manager maintains an optimistic view on the stock market over the medium term driven by the near term implementation of an expansionary policy by the government. Accordingly, we expect a wave of interest rate cuts by the Central Bank of Egypt, as inflation cools down by end of 2017, which would also be supportive for GDP growth. The manager will alter his sector allocation by reducing exposure to the Banking sector, whose profitability is expected to be negatively affected, and increasing exposure to the Real Estate, Industrial and Consumer Staples sectors, which will be beneficiaries of a growth in investments and higher consumer spending.
