

Fund Manager's Strategy & Outlook

September witnessed subdued performance across regional markets with Egypt being the top performer having gained 4.0%. The government announced its ambitious New Suez Canal project which will be dug alongside the existing canal and is slated for an accelerated completion. The project aims to expand trade along the fastest shipping route between Europe and Asia, boosting annual revenues to USD 13.5bn in 2023 compared to USD 5bn currently. The USD 8.5bn in funding for the project has been raised through the issuance of EGP denominated investment certificates to Egyptians yielding 12%. This has significantly increased the number of retail accounts in the banking system and also improved overall market sentiment pushing the index higher.

Across the other markets the Kuwaiti Index gained 3.0% over the month as the Omani, Dubai and Abu Dhabi markets gained 1.6%, 0.6%, and 0.5% respectively. The Qatari and Saudi bourses ended the month having dropped 0.2% and 0.8%. In Dubai the market witnessed the IPO of Emaar Malls Group which was oversubscribed 34x on the institutional tranche and more than 20x on the retail offering. Several new listings are anticipated on the Dubai bourse including Damac and Emaar's hotels division.

Sentiment on the real estate market has been strong as witnessed by the recently concluded Cityscape 2014 exhibition. However prices are showing signs of stabilization with average price growth falling from 6% Q-o-Q in Q2 to 1% in Q3.

The Qatar economy remains resilient with real GDP forecasted to grow 6.8% in 2014. New Central Bank lending restrictions will result in liquidity constraints that will impact balance sheet growth in the sector which has seen 6% in the first half. Banks will face increased cost of funding due to competition for deposits and compression of spreads is expected. In Saudi political risk has increased due to the activities occurring in Yemen however the impact has not been felt on markets which have benefitted from the news of the opening up of the equity market to foreign investors. A strong IPO pipeline in the second half includes the nation's largest lender by assets NCB, as well as other companies in the consumer and retail sectors which will increase the investable universe for the Fund. Over the course of the month the Fund took the opportunity to slowly build up its position in the Turkish market namely in the consumer and industrial sectors. Geo political tensions related to Syria are likely to cause negative headwinds in the short term; providing attractive entry levels.
